

# Doctoral Education Work Group Meeting #7 – 3/12/12

---

## **Discussion Summary**

- Review and discuss data related to GTAs and GRAs at select AAU institutions.
- Work group participated in a “fund sorting” exercise to begin thinking about different ways to create packages for doctoral funding across different types of units.
  - Report out the questions, challenges, and example models from exercise.
- Discuss the content and organization of the final report to the senior vice provost and provost. There cannot be a one-size-fits-all model given the complexity and variety across schools and units. The report should contain a couple of models that are adaptable to a variety of school and unit needs.

## **Decisions and Action Items**

- Work group chair, Danny Anderson, and staff will develop a draft outline of the report for committee review.
